**Canadian Data Report of Fisheries and Aquatic Sciences No. 366**

## Canadian Data Report of Fisheries and Aquatic Sciences

These reports provide a medium for filing and archiving data compilations where little or no analysis is included. Such compilations commonly will have been prepared in support of other journal publications or reports. The subject matter of Data Reports reflects the broad interests and policies of the Department of Fisheries and Oceans, namely, fisheries management, technology and development, ocean sciences, and aquatic environments relevant to Canada.

Numbers 1-25 in this series were issued as Fisheries and Marine Service Data Records. Numbers 26-160 were issued as Department of Fisheries and the Environment, Fisheries and Marine Service Data Reports. The current series name was changed with report number 161.

Data Reports are not intended for general distribution and the contents must not be referred to in other publications without prior written clearance from the issuing establishment. The correct citation appears above the abstract of each report.

## Rapport statistique canadien des sciences halieutiques et aquatiques

Ces rapports servent de base à la compilation des données de classement et d'archives pour lesquelles il y a peu ou point d'analyse. Cette compilation aura d'ordinaire été préparée pour appuyer d'autres publications ou rapports. Les sujets des Rapports statistiques reflètent la vaste gamme des intérêts et politiques du Ministère des Pêches et des Océans, notamment gestion des pêches, techniques et développement, sciences océaniques et environnements aquatiques, au Canada.

Les numéros 1 à 25 de cette série ont été publiés à titre de Records statistiques, Service des pêches et de la mer. Les numéros 26-160 ont été publiés à titre de Rapports statistiques du Service des pêches et de la mer, Ministère des Pêches et de l'Environnement. Le nom de la série a été modifié à partir du numéro 161.

Les Rapports statistiques ne sont pas préparés pour une vaste distribution et leur contenu ne doit pas être mentionné dans une publication sans autorisation écrite préalable de l'établissement auteur. Le titre exact paraît au haut du résumé de chaque rapport.

## ABSTRACT

Haegele, C. W., L. Hop Wo, and C. E. Turner. 1982. Herring tag returns in British Columbia for the 1981-82 herring season. Can. Data Rep. Fish. Aquat. Sci. No. 366: vi + 82 p.

This report provides detailed information on herring tag returns from fisheries during the 1981-82 herring season. Information on returns from all taggings made since the fall of 1979 is also included.

Key words: Pacific herring, tag returns.

## RÉSUMÉ

Haegele, C. W., L. Hop Wo, and C. E. Turner. 1982. Herring tag returns in British Columbia for the 1981-82 herring season. Can. Data Rep. Fish. Aquat. Sci. No. 366: vi + 82 p.

Le présent rapport fournit des données détaillées, à partir des étiquettes récupérées au cours de la saison 1981-1982 de la pêche du hareng. Sont aussi incluses les données de récupération pour tous les étiquetages effectués depuis l'automne 1979.

Mots-clés: hareng du Pacifique, étiquettes récupérées

## INTRODUCTION

This report provides detailed information on herring tag returns from:

1. Fisheries during the 1981-82 herring season, and
2. Taggings that have been made since the beginning of this program in the fall of 1979.

Separate tables are provided for taggings and fisheries for each of the following major geographical divisions of the coast:

Queen Charlotte Islands
North Coast
Central Coast
Johnstone Strait
Strait of Georgia
West Coast of Vancouver Island
U.S.A.

The tagging seasons are spring and fall. Spring taggings were those made near spawning between February and April. Fall taggings were those made on aggregations of fish on feeding grounds offshore or in "holding areas" nearshore between September and January. The fisheries of recapture are defined as follows:

| Fishery | Period |
|---|---|
| Summer and fall | July 1 to the beginning of the food fishery (to Dec. 1 in areas with no food fishery). |
| Food | Fisheries for food and bait regulated by openings and closures. |
| Winter | From the end of the food fishery (from Dec. 1 in areas with no food fishery) to the beginning of the roe fishery (to the beginning of spawning in areas with no roe fishery). |
| Roe | Fisheries for roe regulated by openings and closures, spawn-on-kelp fishing, charter vessel catches of roe herring, and any other catches made during the spawning period in an area. |
| Spring | From the conclusion of spawning in an area to June 30. |

## RESULTS

There were 939 tags recovered during the 1981-82 herring season and 1183 tags recovered since the beginning of the program. For each of the tag returns listed in Tables 2 to 15, the following information is given.

1. Map Ref. The map reference is a letter and number code that identifies the tagging location on a map. The letter refers to a map published in the relevant publication and the number identifies the position of the location on that map. For taggings during the 1979-80 season, the maps are published in Haegele (1981), for the 1980-81 season in Haegele et al. (1982a), and for the 1981-82 season in Haegele et al. (1982b).

2. Locality. The locality is the name of the point of land or body of water in closest proximity to the place of release or recovery and the locality names are compiled in Hourston and Hamer (1979).

3. Date. The date is the calendar date on which a tag was released or recovered. For recoveries for which the month but not the day of recovery was known, the day is given as "00". For recoveries for which there was no information on the date of recovery, the space for date has been left blank.

4. Maturity. The stage of sexual maturity of the fish at tagging is indicated by a two letter code.

| Code | Description |
|---|---|
| IY | mostly immature, young (2-yr-old) fish |
| NY | large proportion of young (2- and 3-yr-old), nearly mature fish |
| MY | large proportion of young (2- and 3-yr-old), fully mature fish |
| NM | nearly mature fish that are two or more weeks from spawning |
| FM | fully mature fish that will spawn within 2 weeks |
| SP | spawning fish |
| ST | spent fish |

5. Tag Mth. The tagging method indicates the type of fishing gear with which the fish were obtained for tagging and whether they were single or double tagged:

SN - seine, single tagged;
TR - trawl, single tagged;
PD - bait or spawn-on-kelp pond, single tagged;
DT - seine, double tagged.

6. Tag type. The length and color of the anchor tag, as described in Haegele et al. (1982b) is specified by tag type:

Long-I is 57 mm, international orange;
Short-Y is 40 mm, yellow;
Short-W is 40 mm, white;
Short-O is 40 mm, orange;
Short-I is 40 mm, international orange; and
Short-P is 40 mm, pink.

A few international orange colored lock-on tags, as described in Haegele et al. (1982b), were also recovered. These are coded as Lockon-I.

7. Fish Rel. This column shows the number of tagged fish released from the set or tow from which the recovered tag originated.

8. Fishery Type. The code, listed in Table 1, indicates the type of gear used and the fishery in which the tagged fish was recovered.

9. No. Tags. The number of tags recovered are shown in this column. These are summed by tagging set in the "taggings" tables and for fisheries and areas in the "fisheries" tables.

10. Days Out. The number of days a tagged fish has been at large are given.
